Final embryo culture and cryopreservation report

Patient	Maya Chen | SYN-MAYA-001	Clinical date	2024-06-19
DOB / age	1993-03-14 / 31 years	Record	D027
Provider	Ari Quill	Status	Final

CYCLE OUTCOME

SYN-IVF-01: 12 retrieved, 10 mature, 8 normally fertilized. Four blastocysts cryopreserved in total. Embryos E01 and E02 vitrified on day 5 (June 18); E03 and E04 on day 6 (June 19). Four other 2PN embryos arrested and were not suitable for freezing under the laboratory policy.

STORAGE

Embryos SYN-E01 to SYN-E04 each stored on an individually labelled device. No embryos transferred in this cycle. PGT not performed; morphology does not confirm chromosomal status. Witnesses Ari Quill and Rena Elm.

PLAN

Four embryos remain stored. Review after recovery to plan a single frozen transfer.
