Pelvic health physiotherapy assessment

Patient	Maya Chen | SYN-MAYA-001	Clinical date	2025-10-03
DOB / age	1993-03-14 / 32 years	Record	D057
Provider	Lumi Fen	Status	Final

SUBJECTIVE

Small leakage with coughing and jogging since birth. No urgency, dysuria, hematuria or pelvic pain. Breastfeeding; no menstrual return yet.

EXAMINATION

Consent and chaperone option documented. Pelvic floor contraction 3/5 with reduced endurance and delayed pre-cough contraction. Healed perineum; no significant prolapse observed.

ASSESSMENT AND PLAN

Postpartum stress urinary incontinence. Teach coordinated pelvic floor contraction, breathing and graded return to exercise. Home practice 8 contractions held up to 6 seconds twice daily as tolerated. Reassess in November; stop if pain occurs.
