Annual longitudinal care review

Patient	Maya Chen | SYN-MAYA-001	Clinical date	2026-12-18
DOB / age	1993-03-14 / 33 years	Record	D070
Provider	Dr Elara Vale	Status	Final

HISTORY

Well, regular natural cycles, no fatigue or urinary leakage. G1P1 after single IVF pregnancy and July 29, 2025 vaginal birth. Uses condoms; no current conception attempts. Child well by patient report; this is not an infant medical chart.

EXAMINATION

BP 112/68, weight 61.4 kg. No abnormal cardiopulmonary or abdominal findings.

REVIEW

December 11 hemoglobin 131 g/L, ferritin 48 ug/L. Recurrent iron deficiency improved; complete last iron dose today and stop December 19. HPV negative January 2026, routine recall January 2031. No evidence of PCOS, endometriosis, gestational diabetes, hypertensive disease or postpartum depression.

PLAN

Continue dietary iron and routine care. Repeat iron studies if symptoms or bleeding recur. Three cryopreserved embryos remain from the single 2024 retrieval; no further treatment scheduled.
