Iron results review and cervical examination

Patient	Maya Chen | SYN-MAYA-001	Clinical date	2022-02-02
DOB / age	1993-03-14 / 28 years	Record	D003
Provider	Dr Elara Vale	Status	Final

SUBJECTIVE

Fatigue persists. No melena, rectal bleeding or abdominal pain. Dietary iron intake is low. Normal menstrual volume by history.

EXAMINATION

Consent obtained for speculum examination; synthetic nurse Rena Elm present as chaperone. Cervix appears normal; no contact bleeding or abnormal discharge. Cervical sample collected.

ASSESSMENT

Ferritin 11 ug/L and hemoglobin 124 g/L on January 21 confirm iron deficiency without anemia. Likely dietary and menstrual contribution; no evidence of a bleeding disorder.

PLAN

Start ferrous sulfate 300 mg (60 mg elemental iron) every other day. Discuss constipation, nausea and separation from tea/calcium. Repeat CBC and ferritin after treatment. Cytology result pending.
