MALDEN COMMUNITY NUTRITION
MEDICAL NUTRITION THERAPY - FOLLOW-UP

Client: Denver Lang Date: 2024-06-10
Dietitian: ___, RD, LDN Visit length: 30 min

ASSESSMENT
Weight 92.6 kg (-2.4 kg in 9 weeks). Waist 109 cm.
Food diary reviewed: soda stopped; coffee without sugar; beer 3 evenings a week. Pizza night weekly. Vegetables now at dinner 5 days a week. Snacks: almonds or fruit.
Activity: trainer twice a week since 2024-05-13; walking 20 minutes daily.

DIAGNOSIS
Excessive energy intake, improving.

INTERVENTION
1. Pizza night: 2 slices with a side salad.
2. Protein at breakfast (eggs or Greek yogurt) to reduce afternoon cravings.
3. Hydration: 6 to 8 glasses of water a day, more on training days.

MONITORING AND EVALUATION
On track at 0.3 kg per week. Next visit in 3 months.
