___ PRIMARY CARE ASSOCIATES
REFERRAL LETTER

Date: 2024-03-20
From: ___, MD, Primary Care
Re: Denver Lang, DOB 1947-08-14, Unit No ___

To: Malden Community Nutrition (Registered Dietitian)
Fellsway Physiotherapy

Reason for Referral:
Supported weight loss and treatment of knee pain limiting walking.

Dear colleagues,

Mr. Lang is a 76 year old man seen for his annual exam on 2024-03-14. He would like to lose weight and walk more. He reports gaining about 8 kg since retiring and that bilateral knee pain, right worse than left, now stops him walking more than 15 minutes.

Problems:
- Type 2 diabetes mellitus since 1987, with peripheral neuropathy and nonproliferative retinopathy. HbA1c 5.4% on 2024-03-14.
- Essential hypertension. BP 88/64 at the 2024-03-14 visit.
- Ischemic heart disease, coronary artery bypass grafting 1997. No angina.
- Hyperlipidemia.
- Osteoarthritis of the knees since 1992.

Medications:
- Metformin ER 500 mg daily
- Lisinopril 10 mg daily
- Hydrochlorothiazide 25 mg daily
- Simvastatin 10 mg at night

Allergies: no known allergies.

Requests:
Dietitian: weight loss plan suited to diabetes, target 0.5 kg per week. Physiotherapy: assessment and exercise program for knee osteoarthritis, with attention to balance given his neuropathy. He may also join a gym; I will provide exercise clearance on request.

Sincerely,
___, MD
