MALDEN COMMUNITY NUTRITION
MEDICAL NUTRITION THERAPY - FOLLOW-UP

Client: Denver Lang Date: 2024-09-16
Dietitian: ___, RD, LDN Visit length: 30 min

ASSESSMENT
Weight 89.9 kg (-5.1 kg since 2024-04-08). Waist 106 cm.
Intake about 2,000 kcal/day. Beer 2 evenings a week.
Reports episodes of lightheadedness on standing over 2 weeks, recorded on his home monitor (lowest 84/56 standing). Fluid intake about 4 glasses a day in recent hot weather. No sweating, shaking or confusion to suggest low blood sugar; he does not take insulin or sulfonylureas.

DIAGNOSIS
Inadequate fluid intake related to hot weather and longer walks as evidenced by intake about 4 glasses a day and dizziness on standing.

INTERVENTION
1. Fluids 8 glasses a day; extra 500 mL on training days.
2. Do not skip meals before training.
3. Advised to contact his physician this week about the low standing blood pressure readings, since he takes two blood pressure medicines and has lost weight. Letter sent to ___, MD.

MONITORING AND EVALUATION
Weight goal 86 kg. Next visit in 4 months.

___, RD, LDN
