Hysterosalpingogram

Patient	Maya Chen | SYN-MAYA-001	Clinical date	2024-02-01
DOB / age	1993-03-14 / 30 years	Record	D017
Provider	Dr Tavi Rowan	Status	Final

INDICATION

Infertility assessment. Cycle day 9, LMP January 24; urine pregnancy test negative today. No symptoms of pelvic infection. Risks explained and consent documented.

TECHNIQUE

Fluoroscopic contrast hysterosalpingography using 8 mL nonionic iodinated contrast. Examination tolerated with brief cramping.

FINDINGS

Normal uterine cavity contour without filling defect. Both tubes opacify; free bilateral intraperitoneal spill. No hydrosalpinx.

IMPRESSION

Bilateral tubal patency. No cavity abnormality identified. This study does not exclude pelvic endometriosis.
