# Routine primary-care consultation

| | | | |
|---|---|---|---|
| Patient | Maya Chen \| SYN-MAYA-001 | Clinical date | 2022-01-18 |
| DOB / age | 1993-03-14 / 28 years | Record | D001 |
| Provider | Dr Elara Vale | Status | Final |

## SUBJECTIVE

New patient visit. Generally well; mild fatigue after work. Menstrual tracking since January: bleeding 4-5 days, moderate first two days, mild cramps, cycles usually 27-31 days. Uses condoms; no pregnancy attempts yet. No intermenstrual or postcoital bleeding. Mostly vegetarian diet; no GI bleeding or blood donation.

## OBJECTIVE

BP 112/70 mmHg, pulse 72/min, weight 60.8 kg, height 165 cm. Heart and lungs normal. No pallor, thyroid enlargement or abdominal tenderness.

## ASSESSMENT

Routine preventive visit. Fatigue requires investigation; iron deficiency is suspected, not yet established. No known chronic illness, prior surgery or drug allergies. Does not smoke; alcohol 0-2 drinks weekly.

## PLAN

Request CBC, ferritin and TSH. Cervical screening appointment arranged for February. Review diet, activity and cycle tracking. Return earlier for worsening fatigue, bleeding or shortness of breath.
