Uterus pathology report

Case TCGA-AP-A1E0

Specimens Submitted: 1: SP: Right parasortic lymph nodes. 2: EP: Uterus, cervix, fallopian tubes and ovaries; total hysterectomy and. bilateral salpingo-oophorectomy. 3: SP: Right external iliac sentinel lymph node. 4: SP: Left external iliac sentinel lymph node. 5: SP: Subaortic lymph nodes. 6: SP: Left paraaortic lymph nodes. 7: SP: Left uterosacral nodule. 8: SP: Rectoseromal nodule. 9: SP: Rectoserosa nodule #2.

DIAGNOSIS: 1. SP: Right para-sortic lymph nodes; dissection: - Metastatic adenocarcinoma in one of four lymph nodes (1/4). 2. SP: Uterua, cervix, fallopian tubes and ovaries; total hysterectomy and. bilateral salpingo-oophorectomy. Tumor Type: Adenocarcinoma, endometrioid type. Architectural Orade (For Endometrioid Types only). II (6-50% solid growth). Nuclear Grade (For Endometricid Typea only). Grade 2. PIGO Grade (For Endometrioid Types only): Grade 2. Myometrial Invasion: (=<50%). Neasures9mm in maximum depth. Myometrium thickneas measures26mm in the area of maximal tunor. invasion. Endocervical Invasion: Not identified. Lymphovascular invasion: Identified. Endometrium: Exhibits complex hyperplasia with atypia. Myometrium: Exhibits multiple leionyomata. Adnexa: Benign ovaries and fallopian tubes. 3. SP: Sentinel lymph node, right external iliac; excision: Two benign lymph nodes (0/2). - Deeper level recuts and apecial staina have been ordered. The resulto. will be reported in an addendum. 4. SP: Sentinel lymph node, left external iliac; excision: - One benign lymph node (0/1). - Deeper level recuts and special stains have been ordered. The results. will be reported in an addendum. 5. SP: Subaortic lymph nodes; excision: One benign lymph node (0/1). SP: Left para-aortic lymph nodes; excision: - Four benign lymph nodes (0/4). SP: Left uterosacral nodule; excision: - Metastatic adenocarcinoma. 8. SP: Rectoserosal nodule, excision: - Netastatic adenocarcinoma. 9. SP: Rectoserosal nodule #2; excision: - Benign fibroadipose tissue with focal calcification.

I ATTEST THAT THE ABOVE DIAGNOSIS IB BASED UPON MY PERSONAL EXAMINATION OF. THE SLIDES (AND/OR OTHER MATERIAL), AND THAT I HAVE REVIEWED AND APPROVED.

THIS REPORT. Procedurem/nddenda: Addendum. Addendum Diagnosis. PARTS 3, 4. SITE: SENTINEL LYMPH NODES, RIGHT AND LEFT EXTERNAL ILIAC: - Additional H/E stained sections and immunohintochemical stains for. cytokeratina (AE1:A83) show no evidence of metastatic tumor. Addendum. Addendum Diagnosis. Part 2. Site: Uterus. - Results of immunohistochemical staining for DNA mismatch repair proteins. are &8 follows: - MLH1: staining present in tumor. - PMS2: ataining present in tumor. - MSH2: staining present in

tumor. - MBII6: staining present in tumor. Conclusion: Immunohiatochemical staining for the tested DNA mismatch repair proteins is. retained in the tumor.
